Spending £10 with us means money circulates round and round our town because we spend with other local businesses- making up to £50 spent locally (figures from a study by the New Economics Foundation).

Spending with local independents boosts our local economy, which makes our town a better place to live work & visit. We call it the Magic Tenner effect. You can read more about it here: [www.magictenner.co.uk](http://www.magictenner.co.uk)
